

KC Back Office

an intelligent integrated accounts solution

Full integration with KCPOS

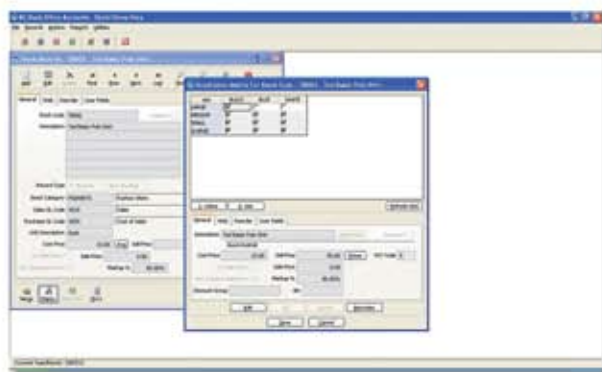

If you need a solution to provide Sales, Purchase, General and Stock ledgers, KC Back Office is the accounts solution for you.

KC Back Office integrates directly with KCPOS and acts as an accounts package in itself, but can also interact with your existing accounts package, such as Pegasus Opera II or Exchequer, to add unique functionality.

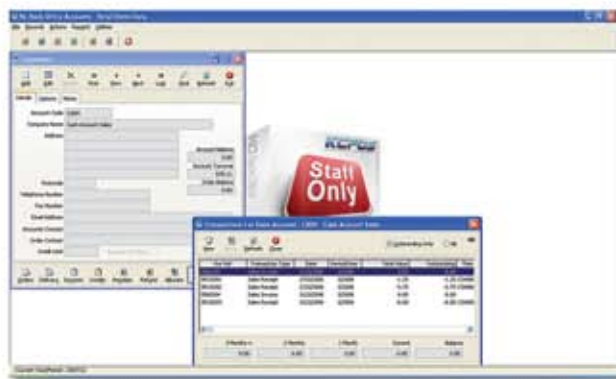

KC Back Office utilises a full size / colour / style matrix with potentially unlimited depth, making this product unique in its unrivaled ability to process multiple descriptions

The easy to use system is the perfect solution for Retailers as KC Back Office has no period or year-ends, and instead uses continual rolling periods with up to 52 accounting periods. This gives total flexibility and the ability to view your accounting figures on a week by week basis rather than monthly.

Key Features:

- Full Size / Colour / Style matrix support
- Mixed environment of matrix and normal items
- Ability to link to other accounts software, such as Opera II or Exchequer
- No period or year-ends, system is continual rolling periods
- Up to 52 period accounting
- Optional multi-location stock control
- Stock discount groups with customers
- Linked to KCPOS
- Stock Units of Measure
- Very simple to use and easy to configure
