

Why buy Zetafax?

Saves you money by reducing your faxing costs

Faxing direct from your PC using Zetafax is up to 80% quicker than using a standard fax machine. The resulting time savings can save your company thousands of dollars through increased productivity.

Scenario:

Your business has 10 fax users each sending an average of 5 faxes per day. For each fax, it takes an average of 5 minutes to print it out, retrieve it from the printer, transfer it to the fax machine, dial the destination fax number, send and wait for the transmission confirmation.

Faxes per user x 5 minutes each	=	25 minutes
25 minutes per user x 10 users	=	250 minutes per day
250 minutes per day x 250 days	=	62,500 minutes per year
1042 hours per year x £12.50 per labor cost	=	£13,025
£13,025 labor cost per year x 80%	=	£10,420 saving!

It's not just labor savings alone. Zetafax will save you money on fax consumables such as paper and toner too. Faxes can also be set to send at off-peak times to save on call charges.

A proven product that you can rely on

Developed in 1991, Zetafax network fax software is used by over 60,000 customers in 106 countries and is sold and supported by a global network of partners.

Works with your existing applications, including email

The Zetafax native integration with Microsoft Exchange/Outlook & IBM Domino/Lotus Notes and means that you can send and receive faxes direct from your email client quickly and easily. To automate faxing from other applications, Zetafax can easily be integrated with your existing accounting, CRM or other system using the optional API Toolkit.

Fast installation & Setup

Zetafax includes a configuration wizard for rapid installation. It helps Administrators get the system operational quickly, guiding them through creating and sharing of system files and folders, creating new users and configuring devices. Zetafax also supports Windows Group Policy, so you can deploy Zetafax Clients and Outlook extensions across your network in one step, all from a central location. If any new users need to be added after initial install, Automatic User Creation enables users to be automatically enrolled when they first open the Zetafax Client software.

At a glance Zetafax is:

- An easy-to-use, flexible network fax solution which expands as your business needs grow
- Available for as few as 5 users it supports up to 200 phone lines on a single server
- Designed to work with your existing applications & infrastructure. It supports a range of fax hardware and software and has native integration with Microsoft Exchange/Outlook and IBM Domino/Lotus Notes
- A reliable and stable product, installed and supported globally
- Easy to manage. Zetafax supports Group Policy, so it can be deployed quickly to multiple users. It also integrates with Active Directory to help reduce Administrator workload
- The only fax software you'll ever need. It offers a wide range of user and management features for all sizes of business

Easy to use, so little training is required

The Zetafax Client is so intuitive it requires little training and is designed to help you organise your faxes simply and effectively. The net result is less time spent learning how to use new software and more time doing your job efficiently. Creating a new fax is quick and simple with the Zetafax creation wizard. The WYSIWYG client lets you create your fax as your recipient will see it, reducing errors and helping you maintain a positive, consistent corporate image.

Support for Server Virtualization

Businesses planning virtualized server environments can enable the Zetafax server in the same environment to provide protection against computer hardware failure. The Zetafax server can be moved onto another physical computer quickly and easily, avoiding the need for a separate failover server just for fax.

Automatic Update Service for continuous efficiency

The Zetafax automatic Update Service provides access to the latest product features, upgrades and updates as they are released. This ensures that your Zetafax system is always up to date, so you can always get support when you need it.

Document automation

Zetafax 2009 includes a module that can manage the production and delivery of almost any documents that are required as part of a business process or workflow. Preferences can be set for delivery via fax or email and Zetafax will create and send in the appropriate document format.

Support for faxing over IP

Zetafax includes a Fax over IP Connector (chargeable add-on) which provides an efficient way to integrate a fax server and phone systems. Voice over IP (VoIP) phone systems can be used for faxing directly, saving the cost of installing separate phone lines for the use by the fax Server. Zetafax also supports a range of media gateways that will manage the communication between the PBX and the IP network via T.38 and enable conversion from T.38 to T.30 for communication over the PSTN, enabling compatibility with traditional fax machines.

Quality technical support from a professional team

Support for Zetafax customers is provided by highly trained, dedicated Equisys technical teams in the UK and USA, and by our accredited distributors outside these regions. The online Equisys Knowledge Base contains technical tips on how to get the most from your Zetafax system.

Rich set of advanced management features

- Advanced server queue management for reprioritizing, aborting or rushing of faxes
- Do-not-dial control, restricting sending access to specific fax numbers
- System wide conversion of inbound faxes to PDF format
- Automatic user account creation
- Business-wide junk fax filtering
- Automatic System Failover ensures faxes are sent even in the event of server failure
- Reporting module, providing full fax log records, charge codes, audit trails and archiving features. Fax usage can be billed to specific departments or clients
- Support for clustered Microsoft Exchange server environments, Windows child domains and Least Cost Routing (Corporate and Enterprise Editions only)
