

KC Link
Integrated eCommerce

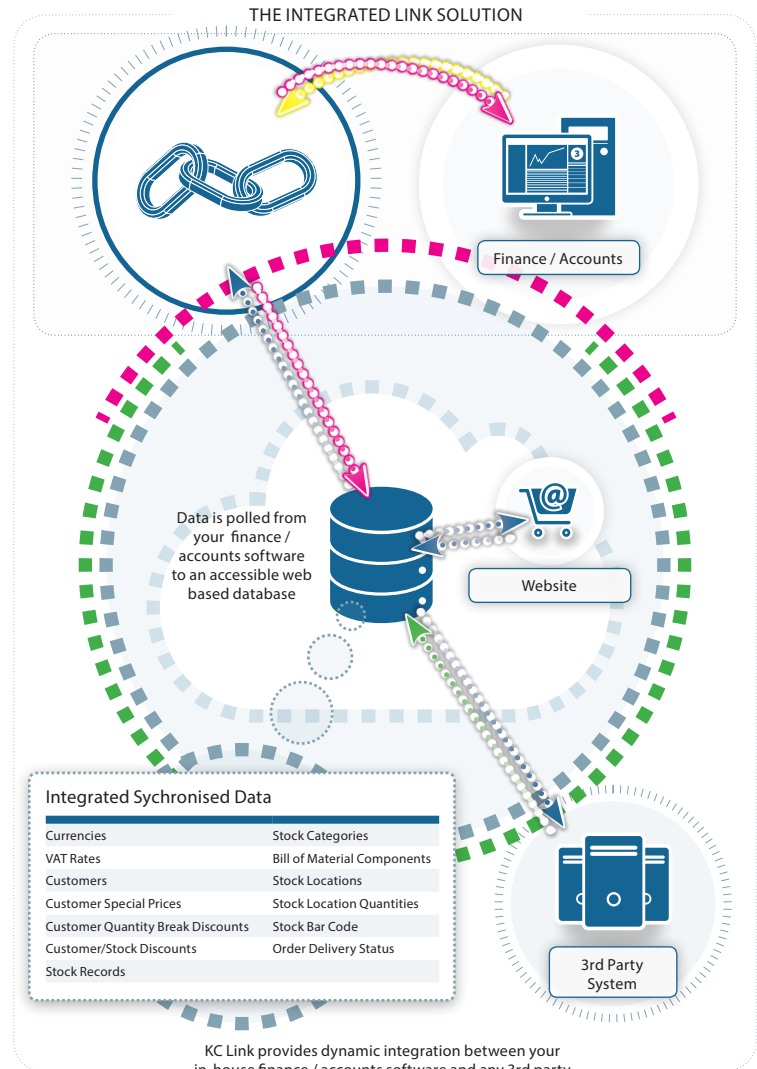

The Power of Web Based Integration

Realise the unlimited potential of an integrated web based solution by synchronising your website or 3rd party software with your accounts software behind the scenes.

Automatically transfer product, pricing and customer account data to your web shop without wasting a second, taking web orders directly from your internal stock record. This removes the necessity to duplicate data across multiple systems and allows for 24/7 connectivity between your office and the web.

KC Link provides a simple method for allowing any 3rd party product to be synchronised with your data which opens up endless possibilities to achieve your business requirements. Instantly benefit from integrating your systems by freeing up time, increasing sales or providing better customer service.

Automatic transfer of data

Instantly update product details across multiple systems

Efficient stock control through a single stock file

Save valuable time otherwise spent inputting data

Free up staff for more important tasks

Reduce human error

Make more money though increased efficiency
